**ASHRAE Awards Todd Rindlibaker Certification for High-Performance Building Design**

ATLANTA—Todd Rindlibaker, P.E., QCxP, LEED™ AP, HBDP, CPD, associate mechanical engineer and project commissioning authority with Salt Lake City-based Total Building Commissioning, Inc. (TBC) has earned a High-Performance Building Design Professional certification from the American Society of Heating, Refrigerating and Air-Conditioning Engineers. ASHRAE's certification program identifies individuals who have demonstrated they have the necessary training and tools for the design of high-performance buildings that live up to their performance capability.

“An ASHRAE certification benefits building owners, employers and individuals,” says ASHRAE President Bill Harrison. “Firms who employ ASHRAE-certified engineers are better able to promote their services, and individuals who are certified approach their design responsibilities with greater confidence. ASHRAE certification helps designers demonstrate that they have mastered a certain body of knowledge in order to stand out from their competition.”

The content of the exam includes sustainability concepts, HVAC and sustainable processes and environmental improvement programs and rating systems; energy analysis; indoor environment; controls and monitoring; benchmarking with performance metrics; water conservation, commissioning in sustainable construction; and operation and maintenance of high-performance buildings.

**Total Building Commissioning, Inc.**

The exam is offered at testing facilities across the United States and in 26 other nations. Persons interested in earning the certification must meet certain eligibility requirements and submit a completed application. A list of recommended resources on high-performance building design from ASHRAE and other sources is available. For more information, visit [www.ashrae.org/certification](http://www.ashrae.org/certification).

ASHRAE, founded in 1894, is an international organization of some 50,000 persons. ASHRAE fulfills its mission of advancing heating, ventilation, air conditioning and refrigeration to serve humanity and promote a sustainable world through research, standards writing, publishing and continuing education.

### **Total Building Commissioning**

TBC comprises a team of engineers and commissioning agents, including engineers with LEED™ expertise. TBC is dedicated to adding value to new and existing buildings by helping owners ensure their buildings function optimally and according to the design intent. Based in Salt Lake City and with more than 25 years experience in building management systems controls, commissioning and re-commissioning, TBC provides commissioning to a broad range of clients throughout the United States and around the world.
